Your MFD just got smarter with EzeScan!

Digitally transform your business with EzeScan's intelligent capture capabilities and your multi-function device. With EzeScan's new Remote Indexing WebApp you can now effortlessly scan and register documents from any brand of MFD, directly into your corporate systems and automatically initiate your business processes faster!

Reduce Document Handling & Increase Productivity

Staying competitive, profitable and successful, for many businesses means being able to action information in a timely manner. Digital transformation initiatives have seen many paper-based processes disappear, however the ones that remain have become a priority for businesses looking for greater operational efficiencies.

Converting paper to digital has been possible for over 20 years however the paper shuffling continues and many organisations still scan their documents after they have been actioned.

Many businesses are searching for technology solutions that;

- capture documents as they enter the business for faster action
- provide an agile working environment with no geographical barriers
- are easy to deploy and use
- can manage document access and workflows
- · can drive document handling costs lower
- can improve user productivity and allow the business to grow.

EzeScan intelligent capture solution for MFD's directly addresses these requirements to allow your staff to capture, register and initiate a business process accurately and effortlessly, anytime and anywhere!

With the minimum of keystrokes a user can simply select the kind of document they wish to capture and EzeScan uniquely aligns the business process with the way the document is captured and how it moves through your business. More importantly your documents will be named correctly, distributed, workflowed, filed and seamlessly uploaded into your corporate business systems.

With EzeScan and your MFD, your organisation just got a whole lot smarter!

How It Works

EzeScan WebApps are powerful business process automation applications designed to deliver hardcopy document and electronic file capture, conversion, processing and routing directly to the desired network location or supported line of business applications.

Simply configure your MFD to submit scanned documents to the EzeScan WebApp Server (EWA) for processing. Users or assigned business units are automatically notified via email of documents with a URL link to the EzeScan Remote Indexing Assistant (RIA) WebApp. With no client software required, browser access ensures PC, Mac or mobile smart device compatibility.

The EzeScan Remote Indexing Assistant (RIA) WebApp can be configured to allow a user to QA, validate and profile captured documents. With the use of configured drop-down menus and database lookups, documents are automatically named based on business standards and correctly filled or routed.

The EzeScan Advantage

EzeScan provides fast, cost effective business process automation solutions including simplified document back scanning, accounts payable, robotic process automation, forms data extraction, mailroom/correspondence automation and highly integrated EDRMS capture. With thousands of installations in Australasia, North America and the UK, EzeScan is your ideal digital transformation provider.
